

SETTING UP APPLICATION

An abstract network diagram in the background, featuring a complex web of interconnected nodes and lines. The nodes are represented by small circles in various shades of brown, tan, and grey. The lines connecting them are thin, light brown or tan. The overall structure is dense and organic, resembling a molecular structure or a complex data network. The diagram is positioned on the right side of the slide, partially overlapping the text area.

Setting up the CLI

You can use the IBM Cloud® Kubernetes Service CLI to create and manage your Kubernetes clusters. To use the API, see [Setting up the API](#).

Installing the IBM Cloud CLI and plug-ins

Install the required CLIs to create and manage your Kubernetes clusters in IBM Cloud Kubernetes Service, and to deploy containerized apps to your cluster.

This task includes the information for installing these CLIs and plug-ins:

- IBM Cloud CLI (`ibmcloud`)
- IBM Cloud Kubernetes Service plug-in (`ibmcloud ks`)
- IBM Cloud Container Registry plug-in (`ibmcloud cr`)
- IBM Cloud Kubernetes Service observability plug-in (`ibmcloud ob`)

DOCKER CLI INSTALLATION

The screenshot shows the Docker documentation website for Windows installation. The browser address bar shows `docs.docker.com/desktop/install/windows-install/`. The page has a blue header with navigation links: Home, Guides, Manuals, Reference, Samples, and Contribute. A search bar is also present. On the left, a sidebar lists various guides, with 'Install on Windows' selected. The main content area is titled 'Install on Windows' and includes a 'Docker Desktop terms' section, a welcome message, a 'Download Docker Desktop for Windows' button, and a 'System requirements' section. On the right, there are 'Page details' (7 minutes read), 'Tags' (windows, install, download, run, docker, local, Docker Desktop), and a 'Contents' table of contents. A 'Give feedback' button is located on the right edge of the page.
